SUMMARY

I help product organizations scale through strategic design leadership, from building design systems that accelerate engineering velocity to launching net-new enterprise products that reach new customer types. Over 10+ years, I've shaped product vision alongside CTOs, led cross-functional teams through discovery to delivery, and embedded AI-driven features helping users accomplish their goals.

EXPERIENCE

Jungle Scout

Jungle Scout provides marketplace intelligence to help Amazon sellers, from aspiring entrepreneurs to large-scale brands, make well-informed decisions about product innovation, advertising, or listing SEO.

Staff Product Designer

August 2025 - August 2026

As Staff Product Designer, I was embedded on a sprint team, owning design and product management responsibilities, and collaborated directly with the CTO to shape the strategic AI vision for our enterprise product, Cobalt.

- Led design and product strategy for a dedicated AI sprint team, shaping roadmap priorities based on direct customer feedback and enterprise use cases. Our AI focused releases quickly became of 60% of the close-won reasons.
- Improved close rates by 75% bringing the from ~20% to ~35% following the launch of our embedded AI features, Ask Cobalt.
- Articulated an AI-embedded product vision that persuaded executives to allocate a dedicated implementation team. Grounded the vision in customer pain points and use cases to illustrate how AI streamlines workflows and boosts demo performance for prospects.
- Translated customer pain points and product vision into technical requirements for AI tooling, partnering with senior and principal engineers to define feasibility and scope.
- Established a customer feedback process that eliminated friction for the product team and accelerated iteration cycles.

UX Design Manager

August 2019 - July 2025

As UX Design Manager, I managed a team of designers and simultaneously contributed as an embedded designer on a sprint team.

SKILLS

Product Thinking & AI

- AI-Integrated Workflow
- Product Strategy
- Problem Framing
- Information Architecture
- Cross-team collaboration

Design & Systems

- Interface Design
- Interaction Design
- Visual Design
- Design Systems
- Prototyping

Research & Leadership

- UX Research
- User Testing
- Project Management
- Coaching & Mentoring
- Stakeholder Alignment

EDUCATION

Bachelor of Applied Art (Visual Communication)

Medicine Hat College

2009 - 2012

Certificate - Cultivating Creative Collaboration

IdeoU

Jan 2021 - Feb 2021

UX Design Manager - Continued

August 2019 - July 2025

- Increased customer trust by redesigning the checkout for greater clarity. Improved the checkout design to help customers understand their purchases, resulting in a 50% reduction in 7-day churn while maintaining conversion rates.
- Designed and delivered a new enterprise product that reached \$1M ARR in 9 months and \$10M ARR within 2 years.
- Built and implemented Jungle Scout's first design system, driving adoption across engineering to reduce development cycles and standardize UI consistency.
- Piloted a program enabling engineers to autonomously iterate on product enhancements, with design providing strategic consultation — accelerating roadmap velocity while maintaining quality.
- Introduced and scaled the Opportunity Solution Tree framework across sprint teams, enabling autonomous problem-solving and aligning discovery work to team OKRs.
- Hired, mentored, and coached UX Designers who supported three distinct product lines.

Senior Product Designer

August 2018 - July 2019

As a Sr Product Designer, I worked as an embedded designer, owning designs from concept development through high-fidelity execution.

- Designed net new features to fill in the gaps of Amazon innovation lifecycle leading a more sticky tool.
- Managed projects from requirement gathering through concept development, high-fidelity design, and developer hand-off.
- Led user research and usability testing initiatives.

Blair & Co. Advertising

Blair & Co. Advertising is an advertising agency specializing in real estate marketing in the Calgary and Edmonton marketplace.

UX / UI Designer

May 2013 - July 2018

As the only UX / UI Designer at Blair & Co, I owned the entire website development process from goal definition & design through launch and site maintenance. I worked closely with developers to ensure we met timelines and our websites met our conversion goals.

- Designed a standardized website template for our largest client that sped up development time and made it easy to optimize all of their websites for conversion.
- Designed an in-house lead management system that became a standard product add-on, converting one-off web clients into recurring revenue streams.
- Owned, designed, and managed all web design projects for all new and existing customers.
- Partnered with clients to define requirements and establish success metrics for new projects.
- Managed ongoing maintenance and optimized performance of a growing portfolio of websites post-launch.
